Summary

I am currently pursuing my bachelor's in Software Engineering. My passion lies in full stack software development and artistic, design ventures. I am goal-oriented, extremely ambitious and keen on winning challenges. Seeking internships and opportunities which would lead me closer to my goals.

Moreover, as an artist, I run an online art business and blog. Maintaining and running this business successfully has taught me sales, marketing, and business skills and strategies.

For my future ventures, I am working to merge my passion for software and love for art in a way that creates a meaningful difference in our space!
